Risks of Security Futures Transactions

CFTC RULE 4.41 HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

DISCLAIMER: Futures and options trading involves substantial risk of loss and is not suitable for every investor. The valuation of futures and options may fluctuate, and, as a result, clients may lose more than their original investment. The impact of seasonal and geopolitical events is already factored into market prices. The highly leveraged nature of futures trading means that small market movements will have a great impact on your trading account and this can work against you, leading to large losses or can work for you, leading to large gains. If the market moves against you, you may sustain a total loss greater than the amount you deposited into your account.

You are responsible for all the risks and financial resources you use and for the chosen trading system. You should not engage in trading unless you fully understand the nature of the transactions you are entering into and the extent of your exposure to loss. If you do not fully understand these risks you must seek independent advice from your financial adviser. All trading strategies are used at your own risk. This software should not be relied upon as advice or construed as providing recommendations of any kind. It is your responsibility to confirm and decide which trades to make. Trade only with risk capital; that is, trade with money that, if lost, will not adversely impact your lifestyle and your ability to meet your financial obligations.

Risks of Security Futures Transactions

- Trading security futures contracts may not be suitable for all investors.
- You may lose a substantial amount of money in a very short period of time.
- The amount you may lose is potentially unlimited and can exceed the amount you originally deposit with your broker.
- This is because futures trading is highly leveraged, with a relatively small amount of money used to establish a position in assets having a much greater value.
- If you are uncomfortable with this level of risk, you should not trade security futures contracts.

Risks of Security Futures Transactions (Cont.)

- All information discussed is based on hypothetical market data. Future results may differ from historical market movements and material presented.
- All data presented is for educational purposes only and this is not a solicitation for trading.
- Full disclosure located at www.nfa.futures.org
- Newbie-Trader.com, EminiJunkie.com, SMARE Investment Group, LLC nor the Presenter can be held liable for any trading actions taken based on information provided.
- The NT Ultimate Fractal Swing Tool is **NOT** Intended for **Live Trading**. THE TOOL SHOULD BE USED FOR **EDUCATIONAL PURPOSES ONLY**.

Price Is Key Driver

- Our Number One Goal As Traders Is To Identify When There Is An Imbalance In Value And Exploit That Imbalance For A High Probability Trading Opportunity.
- The Clearest Way To Observe Movement Is To Remove Time From The Charting Process And Focus On Price Action.
- Developing A System Around Price Action Movement Will Help Eliminate Costly Trading Mistakes Associated With Indicator Error Derived From Time Based Charting.
- The Ultimate Fractal Swing Tool Is A Pure Price Action Based Trading Methodology.

What We Will Cover

- Chart Types and Size
- 1 Trading Patterns To Use For All Markets
- 4 Trend Identification Filters And How To Use Them
- Entry Triggers, Targets and Initial Stop Placement
- 8 Trailing Stop Techniques
- How To Identify Consolidation / Chop
- Alternative Entry Techniques
- Trade Management Using Fibonacci and Symmetry
- Broad Market Index Filter on US Markets
- Moving Between Technique (90%) And Style (10%)

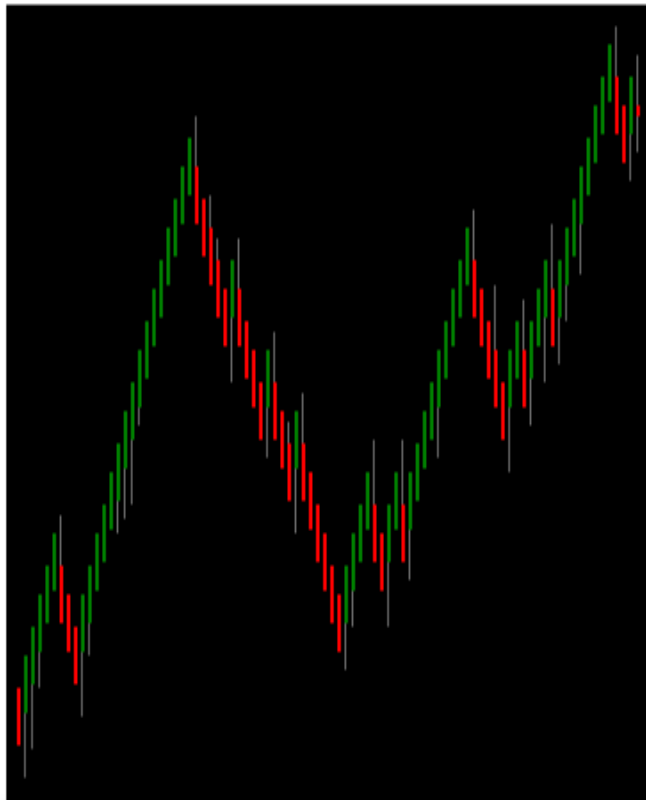

NT Renko Candle

- Pure Price Based Candle
 - Set Wick Color To Dim Gray
 - Days To Load (14)
 - Use Instrument Settings (Setup Videos)
- Value Equals Total Brick Size
 - Body (4 ticks - Open to Close)
 - We Offset Open To Mid-Brick
 - New Candle Will Form
 - Every $\frac{1}{2}$ Brick With Trend (2 ticks from prior close)
 - Every $1\frac{1}{2}$ Brick on Reversal (6 ticks from prior close)
- Compare Price vs. Time

NT Renko Candle - ES 4 Tick

NT Renko Candle vs. Time

NTRenko

10 Min Traditional Candlestick

NT Renko Candle vs. Time

- Time Based Bars Are Messy
- Time Based Bars Can Contain Multiple Patterns
- Time Based Bars Make Reading Indicators Difficult
- Not Used With Ultimate Fractal Swing Tool

10 Min Traditional Candlestick

Suggested Chart Sizes

- The Smaller The NTRenko Value The More Rotations You Will Have
- Smaller Value = Smaller Initial Stop
- Most Markets That Trade With Less Than 0.25 Tick Increments Are Best Suited For Value = 6.
- 6 Ticks
 - YM TF NQ 6E Z CL GC NG HG
- 4 Ticks
 - ES, ZC, ZS

Volatility And NTRenko Value Size

- The previous chart was simply suggested value size based on current market conditions.
- As volatility increases you may want to increase your value to a size that makes the rotations further apart.
 - High Political Unrest
 - Major News etc.
- The value settings are personal preference and should not need to be adjusted that often.
- If you do adjust the settings it is imperative that you spend some time back-testing the results with your Ultimate Fractal Swing Tool.

The Pattern

HPSTN

High

Pull Back

Signal

Trigger

New High

LPSTN

Low

Pull Back

Signal

Trigger

New Low

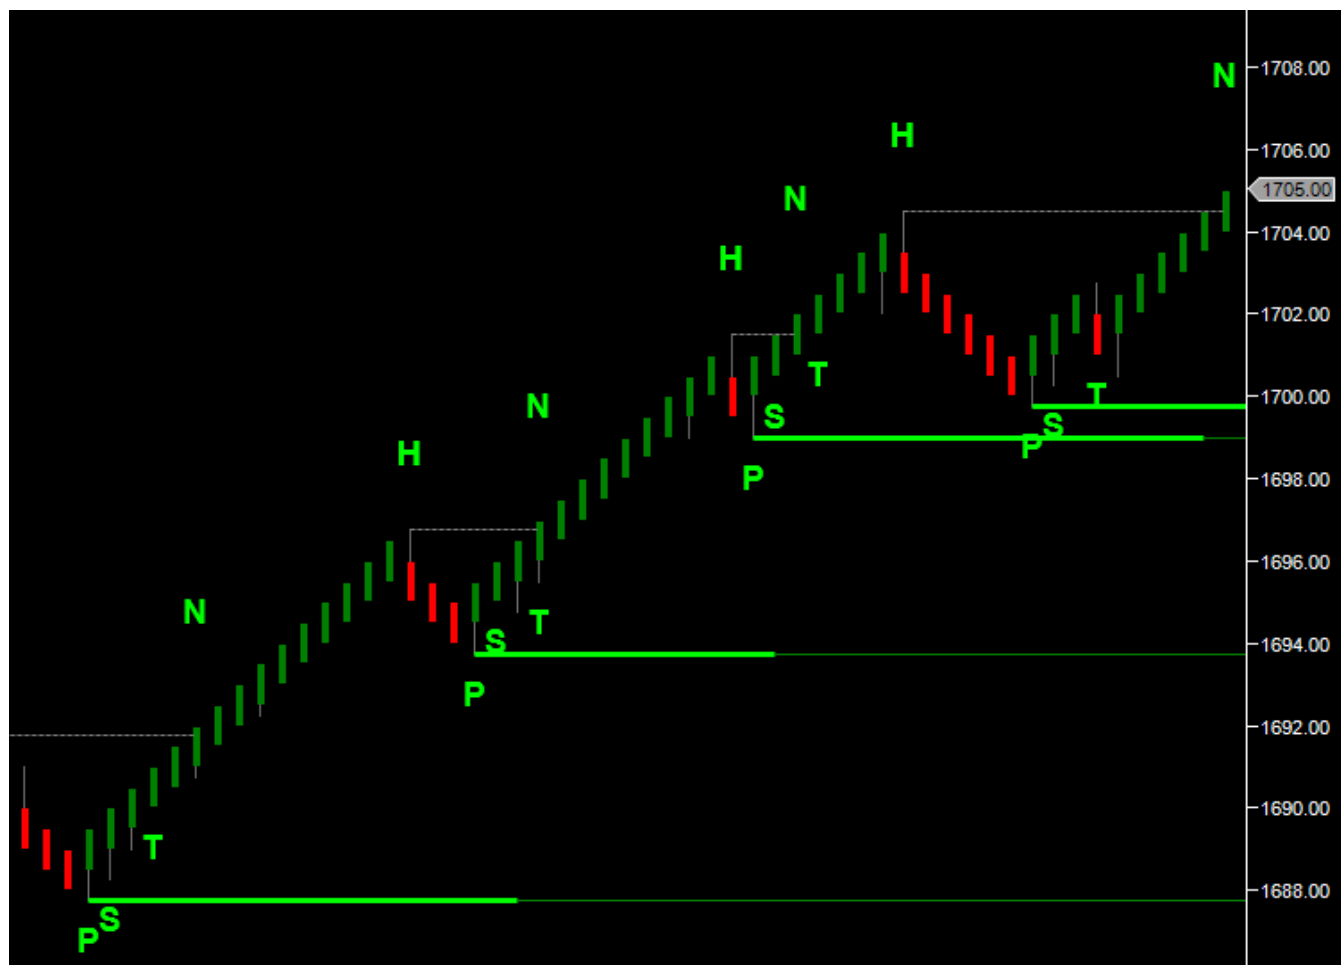

Long Trades

- T = Trade Trigger
 - Long Entry = 3 Ticks Above Close of Signal Bar
 - Trigger Must Be Within 3 Bars of Pull Back
 - Can Only Have a Pull Back After a High
 - Can Only Have A High After a New High
 - Can Only Take Trades in Direction of Active Fractal

Long Fractals

Short Trades

- T = Trade Trigger
 - Short Entry = 3 Ticks Below Close of Signal Bar
 - Trigger Must Be Within 3 Bars of Pull Back
 - Can Only Have a Pull Back After a Low
 - Can Only Have A Low After a New Low
 - Can Only Take Trades in Direction of Active Fractal

Short Fractals

Trend Identification - Fractals

- Fractals Are The Swing High And Swing Low Points Created After A Valid Pull Back New High / Low Combination That Meets Specific Parameters.
- A Complete Series Has The Full Combination of L,P,S,NL (Short-Red) or H,P,S,NH (Long-Green)
 - The T May or May Not Happen in Each Series.
 - After Each NL or NH You Can Start Looking For The P.
 - To Properly Identify The Proper Rotation of Fractals You Need to be Scanning For Long and Short Series at The Same Time And The Rotations Can be Interchangeable.
 - Can Not Be Done Effectively Without Computer.

Trend Identification - Fractals

- The fractals rotate from green to red based on the level of the signal candle (S) low being below the last active green fractal.
- The S candle is the first candle after the pullback (PB) that breaks the PB low by more than $\frac{1}{2}$ the brick size.
 - On a 4 brick candle the S bar would be 2 ticks below the low of the PB.

Trend Identification - Fractals

- Once the 2nd P,S forms that P becomes the active fractal if higher than the 1st rotational series P.
- If it is lower than the 1st rotational series P it only becomes the active fractal once the 2nd NL is formed.

Trend Identification - NTMACloud

- NTMACloud Is nothing more than a moving average crossover.
 - We use a EMA 13 and EMA 21 (default on 4).
 - Intermediate Term Trend
 - Lagging Indicator
 - Our belief is best short term trend trades are taken in the direction of the intermediate term trend.
 - Can Add 89 EMA For Longer Term Trend Line

Trend Identification - NTUltimateCandle

- Specific And Custom To Each Market.
- Identifies Market Direction and Strength.
- Underlying Algorithm Evaluates The Market In Multiple Dimensions And Time-Frames.
 - Time Based Charts
 - Price Based Charts
 - Volume Based Charts

Trend Identification - NTUltimateCandle

- Compare And Contrast Real-Time
 - Buying And Selling Pressure
 - Intra-Bar Analysis
- Compiled Data is Displayed in One Common Candlestick Output Color
 - **Dark Green** (Most Bullish)
 - **Green** (Bullish)
 - **Yellow** (Neutral)
 - **To Red** (Bearish)
 - **To Dark Red** (Most Bearish)

Trend Identification - NTDeltaCross

- Consists of Two Main Parts
 - Delta Lines (Right Scale)
 - Delta
 - MA1 - Fast Moving Average
 - MA2 - Slow Moving Average
 - The Cross of MA1 / MA2
 - Intermediate Term Trend
 - Positive Accumulation >0
 - Negative Accumulation <0
 - Cumulative Value Reset EOD
 - MACD of Delta (Left Scale)
 - Convergence And Divergence
 - Short Term Delta Pressure

All Together

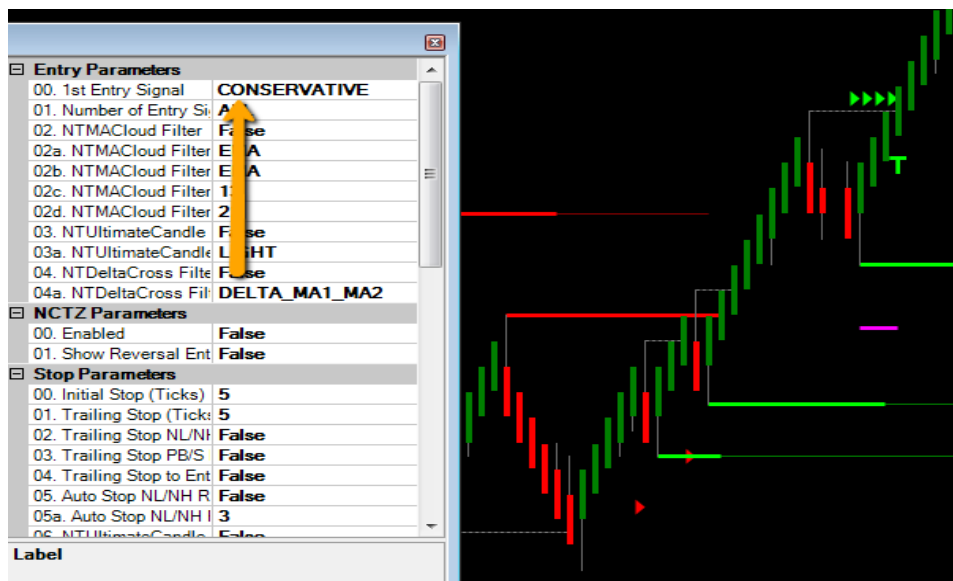

All Together

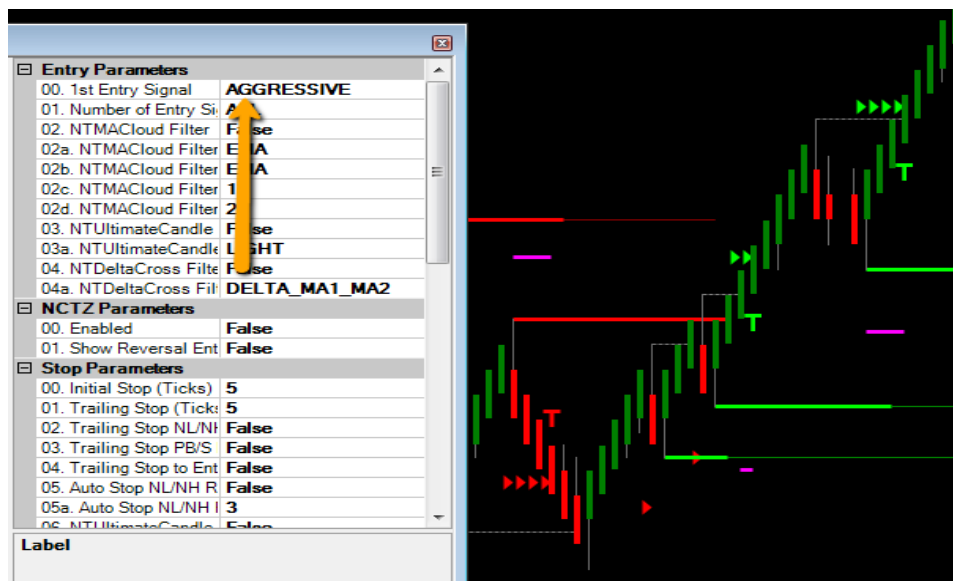

Conservative Trade Trigger Long

- T = Trade Trigger
 - Long Entry = 3 Ticks Above Close of Signal Bar
 - Trigger Must Be Within 3 Bars of Pull Back
 - Can Only Take Trades in Direction of Active Fractal
 - First HPSTN Series After Series That Cause Fractal Rotation

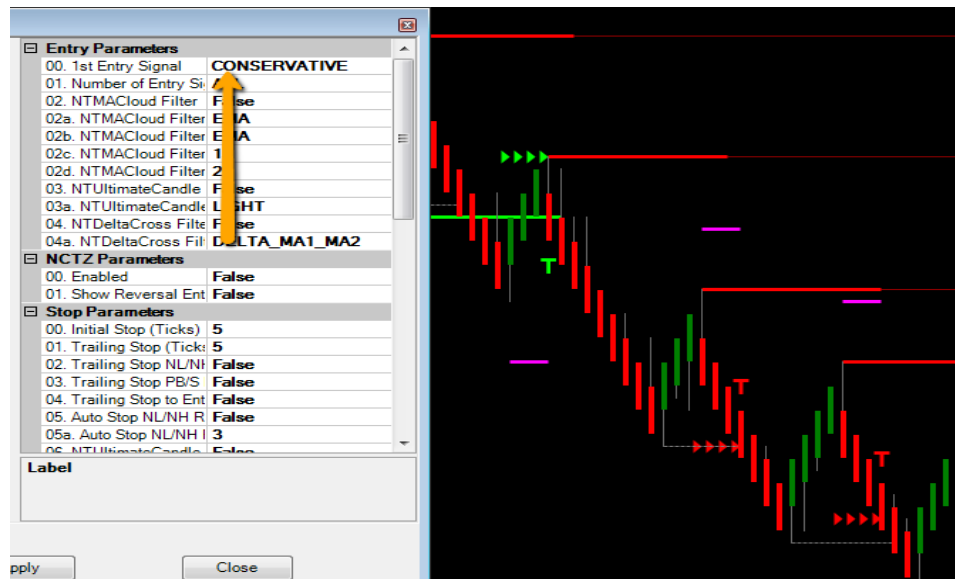

Aggressive Trade Trigger Long

- T = Trade Trigger
 - Long Entry = 3 Ticks Above Close of Signal Bar
 - Trigger Must Be Within 3 Bars of Pull Back
 - Can Only Take Trades in Direction of Active Fractal
 - First HPSTN Series Within Series That Cause Fractal Rotation

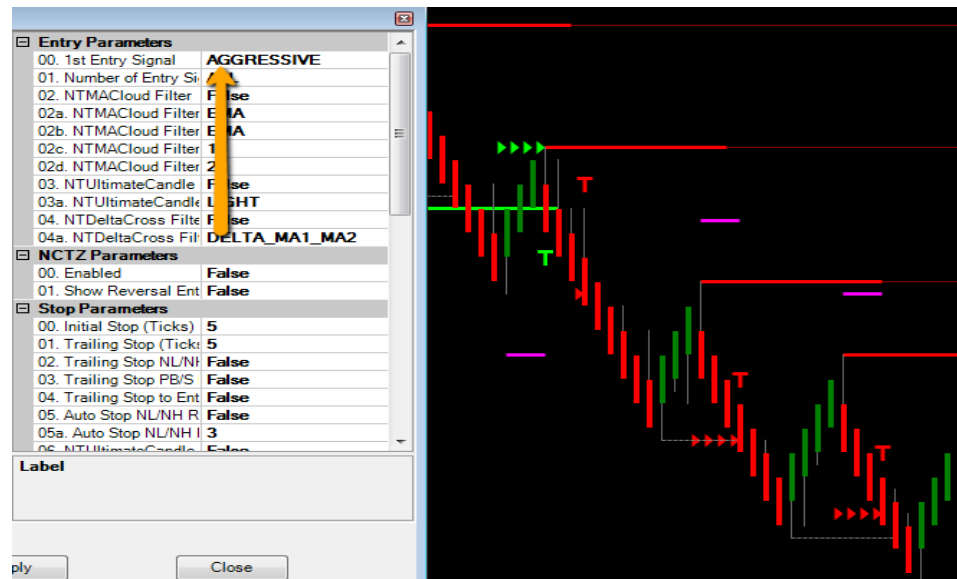

Conservative Trade Trigger Short

- T = Trade Trigger
 - Short Entry = 3 Ticks Below Close of Signal Bar
 - Trigger Must Be Within 3 Bars of Pull Back
 - Can Only Take Trades in Direction of Active Fractal
 - First LPSTN Series After Series That Cause Fractal Rotation

Aggressive Trade Trigger Short

- T = Trade Trigger
 - Short Entry = 3 Ticks Below Close of Signal Bar
 - Trigger Must Be Within 3 Bars of Pull Back
 - Can Only Take Trades in Direction of Active Fractal
 - First LPSTN Series Within Series That Cause Fractal Rotation

Targets and Stops (Personal)

- Best To Trade In Multiples of 3
 - T1 = 2 to 4 Ticks
 - T2 = 4 to 8 Ticks
 - After T2 Move Stop
Entry Minus ($\frac{1}{2} * (T1+T2)$)
 - T3 = Trailing Stop
- Initial Stop
 - # Ticks From Wick on Pull Back Prior to Trigger
 - 3 to 5 Minimum

| 04. NTDeltaCross Filter | False |
| 04a. NTDeltaCross Filter Option | DELTA_MA1_MA2 |

00. Aggressive: First signal can trigger on P,S,T combination within first fractal rotation; Conservative: First signal can only trigger on P,S,T combination within second fractal rotation; Alternative: First signal is not fractal dependent but tied to spacial relationship of gold moving average.

01. Show all entry signals or first only.

02. True: Requires stated moving average type and period to be cross in the same direction of the entry signal.

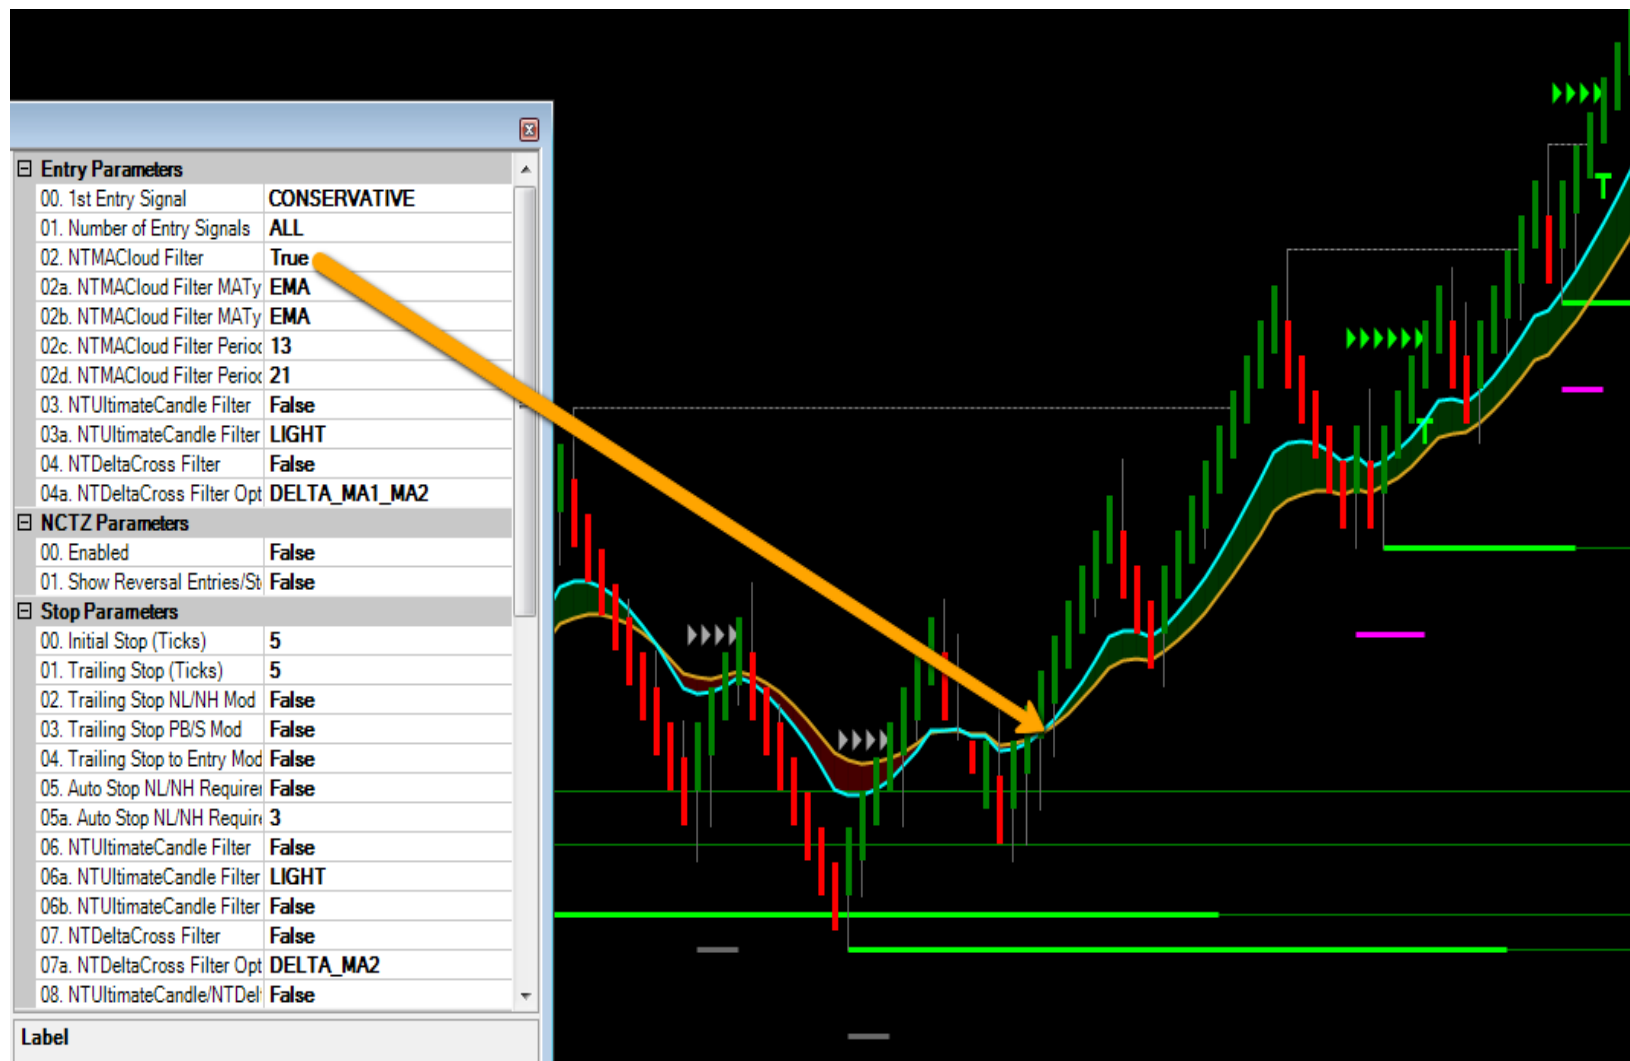

03. True: Requires ultimate candle color to be in the same direction of the entry signal. Can also choose the color to be light or dark.

03a. When light the signal will appear on light or dark candles. When dark the signal will only appear on dark candles.

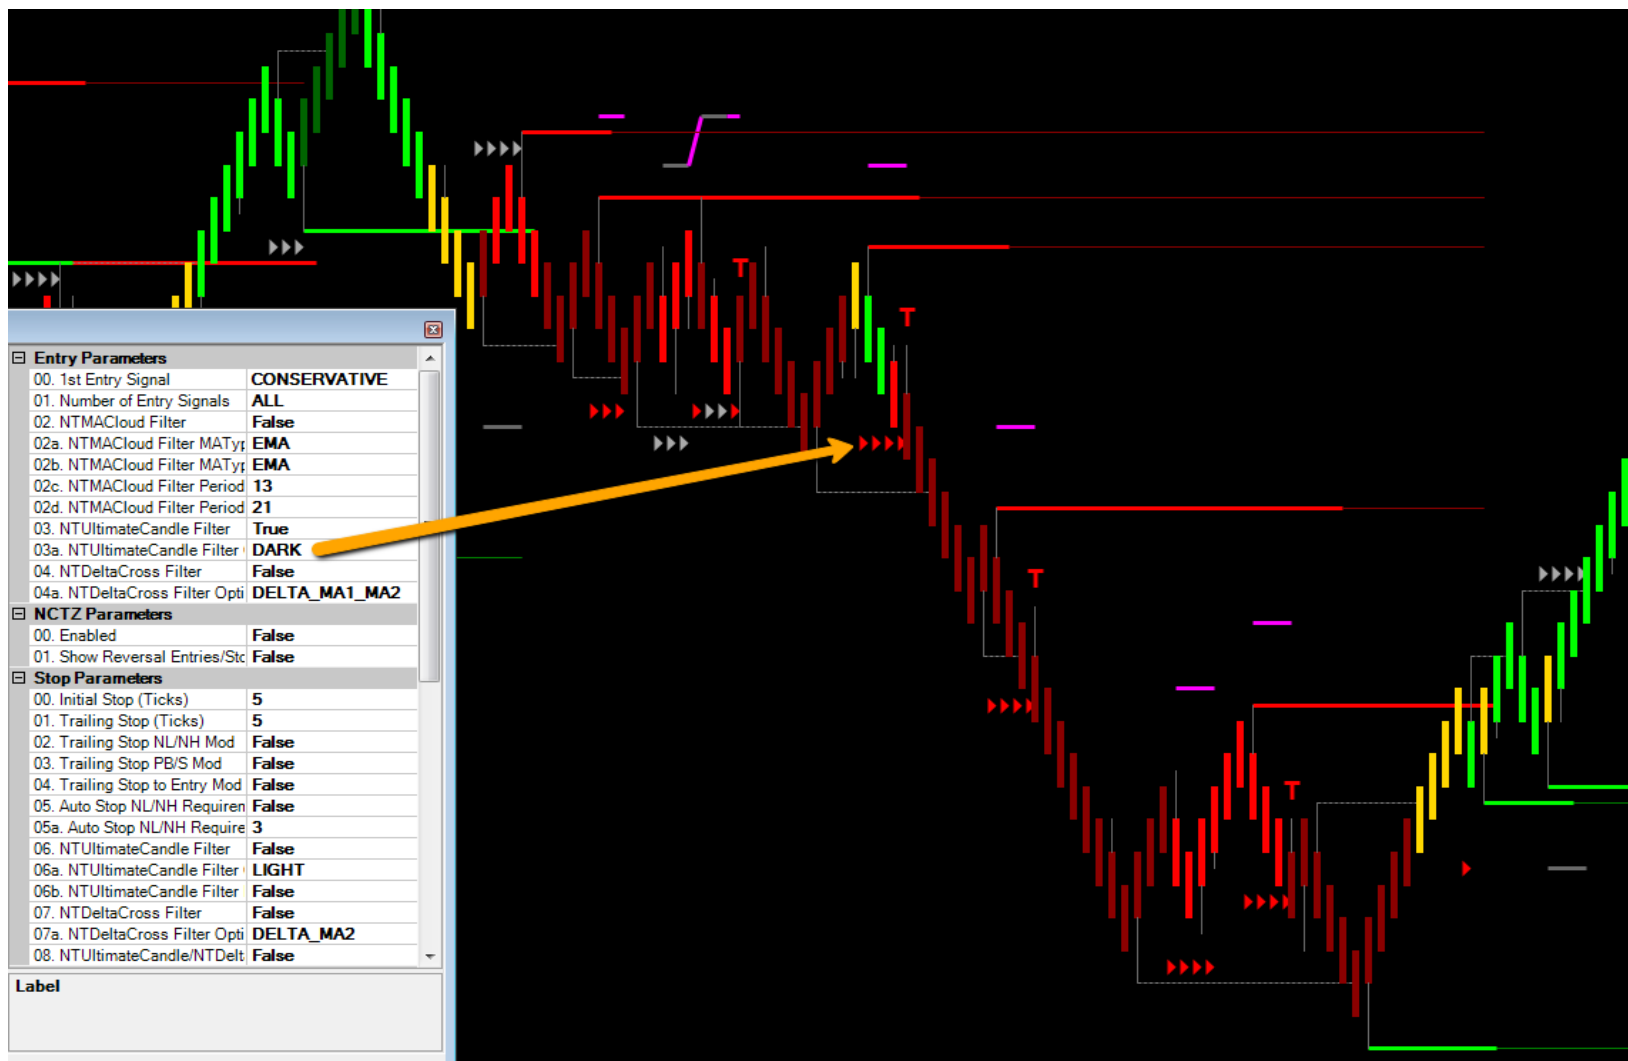

04. True: Requires delta cross to be in the same direction of the entry signal.

04a. Delta_MA1: Grey and Teal crossover relationship; Delta_MA2: Grey and Gold crossover relationship; MA1_MA2: Teal and Gold crossover relationship; Delta_MA1_MA2: Grey to Teal and Teal to Gold crossover relationship.

NTMACloud Filter

NTUltimateCandle Filter

NTDeltaCross Filter

NTDeltaCross and Delta MACD

- **NTDeltaCross**
 - Scale on Right Side of Chart
 - Need to Adjust 0 Line With 0 Line of MACD
 - Cumulative Value Resets at End of Day
 - Intermediate Term Indicator
- **Delta MACD**
 - Scale on Left Side of Chart
 - Need to Adjust 0 Line With 0 Line of NTDeltaCross
 - Measures MACD of Delta
 - Short Term Indicator

NTDeltaCross and Delta MACD

Non Continuous Trade Zone

| | |

 - Private FB Group
- Endless Combination of Entry / Exit Filter Combination Settings
- Same Applies for
 - Alternative

Alternative Entry Technique

1. Can only take trades in the direction of the new fractal shift or opposite side current active fractal.
2. Can only take trades in direction of Price Action cloud cross.
3. Can only take trades in direction of NTDeltaCross (Delta / MA1).
4. Can only take trades in direction of NTUltimateCandle color.
5. Can only go long above Gold moving average and short below (2nd Candle).

Once all criteria is met take 1st trade in that direction.

Alternative Entry Technique

- Can take a 2nd chance trade in that direction if...
 - A reset of NTDeltaCross (Delta&M2) and
 - Price Action Pulls Back to Gold or Active Fractal, or Cloud Cross and
 - Entry is near cloud (2 Candles), above/below the direction of the teal line.
- Avoid trading chop (5 dots in a 7 bar area).
- Initial stop 5 ticks above/below pull back prior to entry.
 - T1 = 2 to 4 ticks (optional adjust stop to Entry -4)
 - T2 = 4 to 8 ticks adjust stop to Entry - ($\frac{1}{2} * (T1 + T2)$)
 - T3 = Optional Trail if trading more than 2 contracts;
 - Pick up system trail base on your criteria

Alternative Entry Technique - 4 Brick

- Can take a 2nd chance trade in that direction if...
 - A reset of NTDeltaCross (Delta&M2) and
 - Price Action Pulls Back to Gold or Active Fractal, or Cloud Cross and
 - Entry is near cloud (2 Candles), above/below the direction of the teal line.
- Avoid trading chop (5 dots in a 7 bar area).
- Initial stop 5 ticks above/below pull back prior to entry.
 - T1 = 2 to 4 ticks (optional adjust stop to Entry -4)
 - T2 = 4 to 8 ticks adjust stop to Entry - ($\frac{1}{2} * (T1 + T2)$)
 - T3 = Optional Trail if trading more than 2 contracts;
 - Pick up system trail base on your criteria

Trade Management Using Fibonacci / Symmetry

- Basic Elliott Wave Theory
 - Impulse Waves (5)
 - Corrective Waves (3; A, B, C)
- Fibonacci Measurements
 - 38.2, 50.0, 61.8, 78.6, 100, 123.6, 161.8, 261.8, 361.8
- Symmetry Measurements
 - 1=5
 - 2=4
 - A=C
 - When C > A; Look for it to become 3...
 - Break 100, Look for 161.8
 - Fractal in Size

Trade Management Using Fibonacci / Symmetry

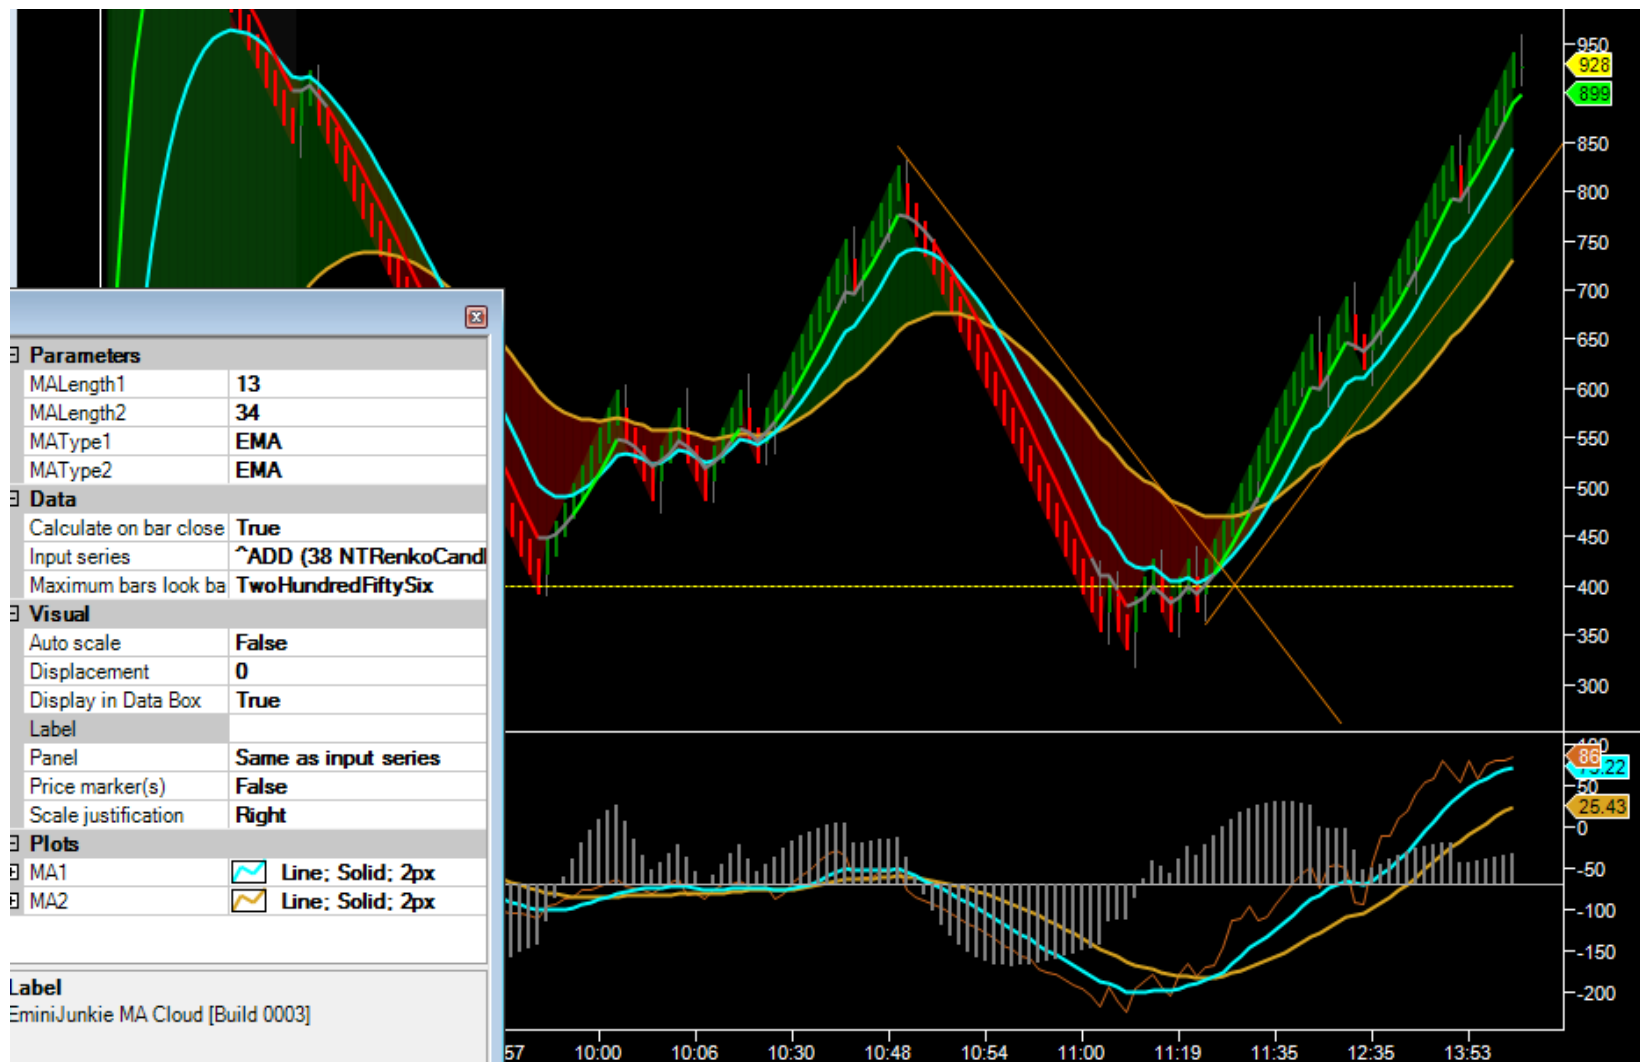

Trade Management Using Fibonacci / Symmetry

- Keep Track of Market on 8 Brick or Larger
- Know The Basic Wave Options
 - Make sure you are not taking a position into
 - Symmetry Target
 - Wait for C to become 3
 - Danger Fibonacci Targets
 - 161.8, 261.8, 361.8

Market Analyzer

The screenshot shows a window titled "Market Analyzer" with a table of market data. The table has columns: Instrument, Active Fractal, Status, PB, LastPrice, TT, and Stop. A yellow header row indicates "6 Tick Alternative". The data rows are:

| Instrument | Active Fractal | Status | PB | LastPrice | TT | Stop |
|--------------------|----------------|---------|---------|-----------|--------|--------|
| 6 Tick Alternative | | | | | | |
| YM 12-13 | | PENDING | 15538 | 15569 | 0 | 0 |
| NQ 12-13 | | PENDING | 3367.50 | 3375.25 | 0.00 | 0.00 |
| 6E 12-13 | | PENDING | 1.3507 | 1.3517 | 0.0000 | 0.0000 |
| CL 12-13 | | PENDING | 94.83 | 94.67 | 0.00 | 0.00 |

- 6 Pre Built Templates
 - File - New - Market Analyzer
 - Have to manually load each symbol
 - 4 And 6 Tick Bricks
 - Aggressive/Conservative/Alternative
 - System Resource Intense
 - 100 Bars on Template
 - For Active Monitor load >500
 - Each Column Monitoring Tool
 - For Each Symbol
 - Update Tool Changes in Each Column
 - Save New Design Templates
 - Close Prior to Saving Charts
 - Only Watch Symbols Planning To Trade
 - Could also delete all but columns 1-3

Technique (90%) vs. Style (10%)

- You Should Be Doing Same Thing Everyday
- Trading Should Become Boring
- Don't Make Up Trade
- Only Trade Signals
 - Crawl, Walk, Run
 - 1-2 Markets Then 3+
 - 1 contract... Earn 2, 3
 - \$5000 per
- Leverage FB Group
- Live Trading Room
- Review Sessions - Live Q&A Outside Trading Room/Hours

Summary Review

- Chart Types and Size
- 1 Trading Patterns To Use For All Markets
- 4 Trend Identification Filters And How To Use Them
- Entry Triggers, Targets and Initial Stop Placement
- 8 Trailing Stop Techniques
